

ConnectAndSell[®]
The End of Dialing™

Job Specification – Sr. Software Engineer

Location: North America

Position: Full Time

Compensation: Competitive Salary, Health Benefits and Stock Options

ConnectAndSell Background:

ConnectAndSell transforms the sales process by eliminating communication barriers. We bring together the latest advances in .NET, open source, and VoIP technologies with our own patent-pending innovations to enhance the ConnectAndSell service which dials and switches millions of calls all over the globe bringing together our users with their prospects in a matter of milliseconds. We work tirelessly to ensure that our multi-tenant SaaS offering is secure, scalable and highly available.

Summary:

ConnectAndSell Engineers are driven by a passion for technology. They have a broad and deep understanding of the software development world spanning Windows and Linux environments, networking, database design, telephony, and SDLC process. They are keen learners, able quickly to master new technologies and understand complex system interactions. They possess strong analytical skills and are able to transform high level business requirements into elegant code with minimal guidance.

Requirements:

The candidate must have an entrepreneurial spirit and be a natural problem solver with strong communications skills. He or she must be an expert in typical C#/.NET software development areas, including but not limited to:

- C#
- Visual Studio 2010
- .NET 3.5/4.0
- MVC/AJAX/ASP.Net
- WCF / .NET Remoting
- SQL Server

Additionally, the candidate shall:

- Possess strong oral and written communication skills
- Be a fast learner, have the ability to grasp and leverage new technologies quickly
- Have experience with and be effective while working independently
- Be a self-starter and take initiative and ownership
- Be able to act on and follow through given general, high-level objectives

Experience:

- 10+ years industry experience
- BA/BS in Computer Science or a related field
